

# 24 Way Angled Unloaded Keystone Patch Panel

## Features & Benefits

- ✘ Enhanced Patch Lead Management
- ✘ Can be used in cabinets and open racks
- ✘ Patent Pending design
- ✘ Suitable for Cat 6A, Cat 6 and Cat 5E installations
- ✘ Integral cable management bars
- ✘ Suitable for Connectix Express Assemblies
- ✘ Earth connection (on shielded version)

Connectix 24 way Angled Panel offers enhanced patch lead management in any style of cabinet. The Patent Pending design naturally sweeps patch leads to the sides of the racking, without the panel protruding beyond the rack or cabinet profiles.

Supplied unloaded, the fully shielded patch panel accepts 10G high performance keystone modules which are simply clicked into position. An unshielded version is also available for Cat 5E and Cat 6 UTP systems.

Two access holes are provided at either side of the panel to allow the routing of cables to the rear of the panel if required.

For the optimum in on-site installation efficiency, Connectix Express pre-terminated and pre-tested assemblies may be used.

## Specification

Width	483 mm (19")
Depth	168 mm
Height	44.5 mm
Material	Mild Steel
Finish	Fine Textured Black Paint (Front) Bright Zinc Plate (Rear)
